Professional Summary

I am a mobile and web developer who builds modern, responsive websites, web applications, and mobile apps using current front-end, back-end, and mobile technologies. I am proficient at creating user-friendly interfaces, integrating web apps with cloud services, and supporting full-stack workflows, with additional experience developing native iOS and Android apps. I am known for writing clean, maintainable code, focusing on user-centered design, and solving real world problems effectively in both independent and remote team environments.

Technical & Communication Skills

- **Languages:** Build web and mobile applications using C#, JavaScript, Swift, HTML5, CSS3, and Python.
- **Frameworks & Platforms:** Develop server-side web applications with ASP.NET MVC/.NET and modern frontend interfaces with React, alongside native iOS development in Swift and Android app development.
- **Web Development:** Create responsive, user-friendly interfaces with HTML5, CSS3, and JavaScript, applying MVC patterns to keep projects organized, maintainable, and easy to work with.
- **Cloud & DevOps:** Work with Microsoft Azure services such as App Service, Functions, Storage, and Key Vault, including secure authentication and authorization aligned with AZ-204 concepts.
- **CRM & Marketing Tools:** Use LeadNerds CRM (Customer Relationship Management) for workflow automation and tools like Canva, Asana, Slack, Zoho Mail, and Google Workspace to support digital marketing and collaborative project work.
- **Testing & QA:** Apply structured testing, debugging, and troubleshooting to improve reliability and catch issues early in the development lifecycle.
- **Tools & IDEs:** Use Visual Studio, Android Studio, Xcode, GitHub, and Visual Studio Code for day-to-day development, version control, and project delivery.
- **Communication & Collaboration:** Demonstrate strong written and verbal communication in client-facing work, collaborate effectively with remote teams using modern communication tools, clearly present technical concepts to diverse audiences, and contribute strategic ideas in team discussions while building trust through clear, solution-focused interactions.

Professional Experience

EPIC Digital - Computer Technician (Self-Employed) | Winnipeg, MB | 2019–2024

- Diagnosed and resolved hardware and software issues for clients, restoring system usability, stability, and performance.
- Built custom computer systems tailored to client needs and budget, drawing on strong knowledge of computer hardware and component compatibility.
- Designed, built, and maintained a professional website to showcase services, manage inquiries, and support an online presence.
- Performed routine system maintenance, including malware remediation, data backup workflows, and preventative care to reduce downtime and data loss.
- Worked directly with clients to understand requirements, explain technical issues in clear language, and deliver reliable, customer-focused solutions.

Katigbak Technologies - Digital Marketing Agency (Remote) | Calgary, AB

Digital Marketing & Web Development Practicum | 140 hours | November–December 2025

- Designed marketing creatives in Canva with compelling copy for digital campaigns, contributing to client-facing content strategies.
- Assisted with website design updates and implemented workflow automations in LeadNerds CRM to improve
- Managed client-facing social media engagement, including comment moderation, community interaction, and engagement metrics while contributing strategic ideas to creative planning discussions.
- Collaborated effectively with remote team using Zoho Mail, Asana, Slack, Traqq, Canva, Google Calendar, and Zoom to coordinate tasks and maintain communication across multiple projects.

Operational & Trades Experience & Skills (9+ Years Ago)

- **Material Handling & Equipment Operation:** Forklift certification and operation, warehouse and inventory management.
- **Safety & Compliance:** WHMIS training, First Aid certification (Previous training).
- **Fabrication & Manufacturing:** Precision work with injection molding equipment, fabrication and assembly processes, quality control and attention to detail.

- **Construction & Carpentry:** Residential renovation, carpentry, general maintenance, and problem-solving across diverse building projects.
- **Equipment Maintenance & Troubleshooting:** Hands-on diagnostic and repair experience, preventative maintenance, working with mechanical and electrical systems.
- **Safety-Focused Operations:** Strong commitment to workplace safety protocols, risk assessment, and reliable execution in fast-paced industrial environments.
